

MUHAMMAD ANS

Full-Stack Developer (Laravel | Nuxt | Vue.js)

ans2003@gmail.com | +92 323 4535756 | Lahore, Pakistan

[linkedin.com/in/muhammadans](#) | [github.com/ans1](#)

Professional Summary

Full-stack developer with **6+ years of experience** delivering **Laravel**-based back-ends (REST APIs, Eloquent ORM, web services) and modern front-ends with **Nuxt.js** and **Vue.js**. Proven record of leading development teams, conducting code reviews, and shipping production-ready features across travel, real-estate, academic, legal, and SaaS domains. Over the past **year**, has adopted **AI-assisted "vibe coding" workflows** to independently design and build full products end-to-end — architecture, UX/UI, and implementation — without a dedicated design team. Trusted for **ownership**, fast delivery, and effective collaboration with cross-functional stakeholders.

Core Skills

Back-End	PHP (8+), Laravel, REST APIs, Eloquent ORM, MySQL (8+), Sanctum, Queues, AI Integration
Front-End	Nuxt 4, Vue.js, Nuxt UI v4, Tailwind CSS, Pinia, SCSS, HTML5
AI Workflow	AI-Assisted "Vibe Coding" (1+ yr), Independent Product Design & R&D, Claude, Cursor
Workflow	Docker, GitHub, Postman, PhpStorm, Visual Studio Code, Laragon

Experience

Senior Full-Stack Developer 2023
CrewLogix — Lahore, Pakistan

- Led end-to-end full-stack delivery of Laravel applications, designing and maintaining REST APIs consumed by web and mobile clients.
- Built user-facing features with Nuxt.js / Vue.js and modern UI tooling, keeping releases stable through task planning, code reviews, and team mentoring.

Senior Full-Stack Developer 2020 – 2023
TechNation — Abu Dhabi, UAE

- Built and maintained Laravel web services and core business logic for multiple client-facing applications over a 3-year engagement.
- Delivered responsive front-ends with Nuxt.js / Vue.js, collaborating directly with stakeholders to drive features from requirements through production release.

Freelance Full-Stack Developer 2017 – 2020
Independent — Remote

- Delivered end-to-end web projects for independent clients, building Laravel back-ends and Vue.js front-ends across e-commerce, service, and content platforms.
- Managed full project lifecycle — requirements, development, testing, and deployment — for multiple concurrent client engagements.

Senior Web Developer

2015 – 2017

Favethemes

- Developed and enhanced ThemeForest real-estate themes (Houzez, Homey) with a focus on WordPress, PHP, and front-end engineering.
- Improved responsiveness and usability; built reusable UI components adopted across multiple premium theme releases.

Web Developer

2014 – 2015

Emenac Travel

- Implemented custom CMS features and e-booking flows using PHP, MySQL, and JavaScript.
- Maintained and enhanced travel websites with a focus on reliability, performance, and cross-browser compatibility.

Selected Projects

Safareva (in production — not publicly accessible)

Laravel · Nuxt 4 · Nuxt UI v4 · Vue.js · Tailwind CSS · MySQL · REST API · AI Integration

A multi-vertical travel package marketplace where travel agencies list packages and travellers browse and enquire. Built the full stack — a Laravel REST API back-end with a dedicated admin panel and a Nuxt.js 4 / Nuxt UI v4 customer-facing front-end. The platform is architected around dynamic service types (Pilgrimage, Holidays, and more) each with their own theme, navigation, and categories, enabling the product to expand verticals without code changes. Features include agency onboarding & dashboards, an AI-assisted package builder, multi-currency pricing, search, and a CMS-driven page system. Owned the product end-to-end solo — researched the market, designed the entire UX/UI from scratch, and built the full stack using AI-assisted "vibe coding" combined with hands-on engineering, with no dedicated designer on the project.

UQU Journals System

Laravel · PHPWord · Pandoc · Vue 3 · Vite · CKEditor 5 · LaTeX · i18n (AR/EN, RTL)

A full-stack journal article publishing tool built for Umm Al-Qura University, Saudi Arabia. Built the Laravel API that parses uploaded Word documents (via PHPWord/Pandoc) into structured sections and compiles edited content into a publication-ready PDF through a custom LaTeX generation pipeline, alongside the Vue 3 front-end where users review, edit (text, tables, images, references, nested subsections) via a CKEditor-powered interface with drag-and-drop reordering. Delivered full Arabic/English localisation with RTL support.

ScrapingHome	Laravel + Nuxt.js — Full-stack development
Kargenic	Laravel — Back-end development & team leadership
Adrenagy	Laravel + front-end — Full-stack development
Fraisebonbon	Laravel — Front-end & web services
Ethmad	Laravel + front-end — Full-stack development
Lawyer Finder	Laravel — Back-end development (active)
Numbids	Laravel — Back-end development (active)
Houzez / Homey	WordPress / PHP — Front-end development
Origami	WordPress — Front-end; led WordPress team
Wedosmarthoms	WordPress — Full development

Additional web-services work: Sechoir, ADCycling, Cacao, Cars247, Fatimawithlove.

Education

BA — University of the Punjab, Pakistan (c. 2014)

Intermediate — Lahore Board, Pakistan

Matriculation — Rawalpindi Board, Pakistan

English Language — A-Level
